Tran Quốc Khanh

Junior Software Engineer

Ho Chi Minh City, Vietnam — +84 394 551 401
khanhtranquoc44@gmail.com — github.com/Trqkhanh17

Summary

Software Engineer passionate about building useful software and solving real-world problems. Curious by nature, enjoy learning new technologies, collaborating with others, and continuously improving both technical and problem-solving skills through real-world product development.

Technical Skills

Languages	Python, JavaScript, TypeScript
Frontend	ReactJS, Next.js, Tailwind CSS, TanStack Query, Zustand, shadcn/ui
Backend	Django, Django REST Framework, Authentication & Authorization, NestJS, ExpressJS
Database	PostgreSQL, MySQL, MongoDB, Query Optimization
Tools	Git, Docker, Linux
Testing	Unit Testing, End-to-End Testing
Other	Requirement Analysis, Business Workflow Design, System Integration, AI-Assisted Development

Professional Experience

Software Engineer TTMI Joint Stock Company	Oct 2025 – Present
--	--------------------

- Implemented POS modules for menu management, item categories, customization options, and branch-based product configuration for a multi-brand beverage retail system.
- Developed voucher validation and sales-channel configuration features, supporting pricing and promotion rules across multiple store branches.
- Developed CRM features, reporting dashboards, and REST APIs supporting online sales, order management, product management, and delivery workflows for internal business users.
- Optimized reporting and data-fetching performance through database query improvements and more efficient API data retrieval strategies.
- Worked directly with relevant departments to clarify business workflows and requirements for new or unclear feature requests before implementation.
- Developed backend services and REST APIs for an ERP warehouse receiving application, supporting barcode-based product lookup, shelf-location tracking by store, purchase requests, goods receiving requests, and warehouse-related data flows.
- Implemented workflows for tracking product locations across shelves in multiple stores, helping warehouse staff identify storage positions and support receiving operations.
- Developed administrative interfaces and frontend features for internal business systems, working across API integration, state management, and business workflow handling.
- Wrote and maintained unit and end-to-end test cases for key business workflows to validate expected behavior before deployment.

Education

Nam Can Tho University

2021 – 2025

Bachelor of Engineering in Information Technology

GPA: 3.0 / 4.0

Additional Information

- **Languages:** Comfortable reading technical documentation, API references, and writing development-related English documentation.
- **Continuous Learning:** Continuously improving expertise in Django, Database Optimization, SOLID, Clean Architecture, Enterprise Software Design, and ERP business workflows.
